HOUSEHOLD MAIL BOXES
REVOLUTIONIZE THE
LETTER CARRIER SERVICE

Clifford J. Alexander
The 4th Annual Postal History Symposium
November 1, 2009
“The United States Post Office does not assume to itself the duty of taking letters to the houses of those for whom they are intended but holds itself as having completed the work for which the original postage has been paid when it has brought them to the window of the post office of the town to which they are addressed. The recognized official method of delivery is from the post office window. Merchants and persons in trade have boxes at the windows for which they pay. In some towns letters can be received by the subsidiary official carriers and persons availing themselves of this service must pay for them separately. But the poorer classes of the community have to obtain their letters from the post office window.”

POST OFFICE INITIATIVES IN 1880s and 1890s

- Pneumatic tubes
- Mail wagons
- Street cars
- Commemorative stamps
- Rural free delivery
- Home collections
- Residential letter boxes
CARRIER SERVICE ISSUES IN 1890

- Post offices were running out of space for boxes (New York had 10,000)

- Carriers were estimated to spend one-fourth of their time waiting for residents to answer the doors and accept mail
WHAT IS MEANT BY “LETTER BOX”

- Collection boxes on street
- Collection boxes on lamp posts
- Boxes at post offices
- Boxes on posts besides highways
- Boxes attached to or built into walls or doors of residences
THE 1890 COMMISSION

• Appointed by Postmaster General John Wanamaker

• Five of the leading U.S. postmasters

• Directed to entertain proposals for a small, safe and inexpensive letter box
THE COMMISSION’S CRITERIA FOR A LETTER BOX

- Inexpensive
- Neat
- Weatherproof
- Safe
- Difficult to break
- Quick to open
- Attractive looking
- Big enough for newspapers
- Sign to show presence of mail
INVENTORS WERE ENCOURAGED

- 217 patents for letter boxes were issued in the 10 years from 1887 to 1896

- 108 patents were issued in 1891 and 1892 alone
FOUR BOXES ACCEPTED BY THE POSTMASTER GENERAL

• Combination collection and delivery box for inside use (Cushing & Mitchell)
  ▪ Accepts letters, magazines, newspapers and small packages
  ▪ Can be adapted to doors and walls

• Small delivery box (Ringen)
  ▪ Cheapness and strength

• Outside collection and box (Taylor)
  ▪ Can be placed on walls, doors and posts

• Outside collection and delivery box (Taylor)
  ▪ Has automatic sign
WASHINGTON, D.C. AND ST. LOUIS EXPERIMENTS

• Washington, D.C.
  ▪ An easy-to-use box was installed
  ▪ Carriers saved one hour each day

• St. Louis
  ▪ A difficult-to-use box was installed
  ▪ No additional time was spent by carriers
  ▪ Mail volume increased by 400 percent
SEPTEMBER 9, 1892 POSTMASTER GENERAL ORDER

• Applied to free delivery cities (with approximately 3 million residences)

• Provided for free collections, as well as free deliveries

• Areas qualified when 2/3 of the houses had installed an approved letter box
Claim. — 1. The combination of a face plate having a port, a door having a mail slot or port, a box or receptacle for mail to be collected, an apron flexibly connected with the box, a flap and means, controlled by the door, for holding the apron above the flap when the door is closed and for permitting it to drop and form a chute over or on to the door when the same is opened, substantially as described.

2. The combination of a face plate having a port, a door having a mail slot, a flap pivoted to the door, a box or receptacle for collection mail, an apron flexibly connected with the box and a tongue connected with the door for holding and dropping the apron, substantially as described.

3. The combination of a mail box, a lid or cover for said box, a door leading from outside a wall to said box, a signal outside the box, a lever directly connected with the signal, a direct connection between the lever and the lid and a catch or dog arranged to engage the signal bar and hold it in adjusted position when the door is closed, substantially as described.
Postal Improvement Company
(INCORPORATED)

Manufacturers of Devices for the improvement of the Mail Service.

Exclusive makers of the devices recommended by the House Letter Box Commission and tested and adopted by the Post Office Department for extending the house-to-house collections system to towns and cities having free delivery.

General Office and Factory at Norristown, Pennsylvania.
Office of the Secretary and Washington Director, 1901 Q Street Northwest, Washington, D.C.

ILLUSTRATIONS OF AN APPROVED BOX

The inside delivery and collection box attached to a door, giving a view of the device on the inside of the house with mail posted by householder for collection by carrier, the lid being left open for increased capacity.

As the box appears on the outside of a door, the call-disk having been raised automatically by the opening of the cover to posting compartment. The name “Ferribe” is the householder’s name, and the number—5476—the house number.

SOURCE: 1892 ANNUAL REPORT of the Postmaster General of the United States.
ILLUSTRATIONS OF AN APPROVED BOX

Here the carrier has unlocked the door of plate to collect mail posted—the call-disk having dropped automatically when the carrier’s door is unlocked.

The carrier is delivering a bundle of mail matter through the delivery port.

SOURCE: 1892 ANNUAL REPORT of the Postmaster General of the United States.
ILLUSTRATIONS OF AN APPROVED BOX

In this view the carrier is delivering a package, the larger opening being obtained by unlocking the carrier's door.

Here the householder has unlocked the lower compartment preparatory to taking out the mail delivered by carrier. Another application of this box is its construction in the wall of a house, bringing the back of the box flush with the inside wall.

SOURCE: 1892 ANNUAL REPORT of the Postmaster General of the United States.
ILLUSTRATIONS OF AN APPROVED BOX

A view of the outside delivery and collection box, with call disk up to indicate to carrier that there is mail to collect.

Showing the operation of delivering mail to the outside device through the delivery port in the bottom of the box.
