

Make Your Own Postcard Template

Postcards have been used as an efficient way to send messages to loved ones since the 1840s. Whether mailed from a faraway place while on vacation or sent as a quick pick-me-up, postcards are an easy way to show someone that you are thinking of them. Using the template below, you can print out your own postcard and decorate the front in whatever creative way you desire.

TIPS:

- **Printer should be set to “Print Actual Size”.**
- **After printing, measure the Test Square, making sure it is 1” x 1”, to ensure template meets USPS size requirements for postcards.**
